FOURTH QUARTER
Accounting Solution

Stable Software for a Changing World
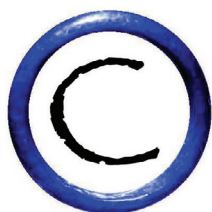

Core Accounting

Powerful AR and AP	Handle payments by journal, account, or transaction.
User Access Control	Set privileges by journal, group, user, and data type.
Finance Analysis	Drill-down financial reports with budgets and analysis.
Multi-User Notes	System-wide alerts, task list and note sharing systems.
Attractive Interface	Configurable forms, colors, data and task oriented screens.
Built-in DB Tools	DB testing, optimization, maintenance and repair tools.

Business System

Sales Order Tracking	Centralized invoices and POs, quotes, backorders, shipping and returns. Service invoices, variable item codes and descriptions. Batch and real-time processing.
Flexible Pricing	Pricing by customer type, vendor, or contract, multiple graduated schedules with fixed or % pricing formulas, and promotional discounts.
Inventory Management	Multi-level BOM, multiple sales units, auto-assembly, kits, alternative quantities, lot and serial numbers, multiwarehouses and commission formulas, item level tracking.

Job Costing

Structure	Fixed price, cost plus, and margin. Multiple levels, types, and codes for complex strategies and situations.
Analysis	Track revisions, estimates, and recovery using real-time, on-screen analysis. Escalation, P&L, billing, labor, etc.
Detail	View phase activity, cost, budget, margin, change orders. Direct and indirect costs, tendered and revised estimates.
Integration	Split accounting items between jobs, make direct entries.

Plus

Multiple Currencies	Unlimited time and date sensitive conversion tables, simultaneous dual currency recording.
Programmable Reports	Open-source, 4D-based reports, SuperReports in the compiled version, and Crystal Reports via ODBC.
Modular Source Code	Patented separation of business and accounting provides for the lowest cost of customization and maintenance.
Web-based eCommerce	Shopping cart services link directly through DeepSkyTech's Store-Secure with optional hosting.
Accessible Database	Connectivity through ODBC, SOAP, SML, and 4D Open.

You know what you want—Let's do it!
